

FRESHAIR EVEREST

Quickstart

1. Place your unit as high up as practical.
(to achieve circulation efficiency)

2. Insert the power supply plug into the power receptacle on the rear of the unit. Plug the appropriate cord into the power supply and into a working electrical outlet.

Refer to your owner's manual for complete set up and adjustment procedures.

3. Put the included AAA batteries in the remote.

4. Press the POWER button and set the fan to an acceptable level.
Turn the Purifier function ON by pressing the PURIFIER ON/OFF button.

Typical display setting shown here for example.

vollara®
